"MADE TOUGH FOR THE TOUGH AUSTRALIAN CONDITIONS".

It is fabricated from heavy galvanised wire for extended life. METALMAX® Fencing features a unique 'smooth knot' design. This knot is smooth either side of the fence - no sharp edges protrude to cause injury. One piece vertical pickets are tied to the line wires and crimped at the joints. The tightness of this knot crimp enhances the stiffness of the fence as it resists slippage along either picket or line wires. This tough, durable construction prevents the fence from buckling if impacted by larger animals, yet also provides extra rigidity and flexibility for installation over undulating land.

Ring Fastener Gun

Stainless steel, easy to use, fast and reliable. Will manually fasten clips to a rate of 25 metres per minute.
